## Projects

### 1.E-Commerce Web App

Full-stack e-commerce web application built with the MERN stack, featuring user authentication, product management, a shopping cart, and an order management system. Designed for smooth performance and a responsive user interface.

### 2.Blog Application with Gemini AI

Built a MERN-based blog application integrated with Gemini AI for content generation and summarization. Features include user authentication, post creation, and a responsive user interface built with Tailwind CSS.

🔗 <https://blog-app-client-psi-three.vercel.app>

### 3.Real-Time Chat Application

Developed a real-time chat application using the MERN stack and Socket.io for instant messaging. Key features include user authentication, online status indicators, and a responsive chat interface.
